3 separate google classrooms for different maths groups using white rose lessons (video, powerpoint, worksheet, answer sheet, true or false question, flashback four) or other resources suited to the group e.g. I see maths or teacher made slides. Daily literacy lessons, maths and spelling games, humanities or science task, times tables and spellings.

## Google Stream

- Any achievements will be celebrated- star of the week, class attendance, hot homework...
- Photos of activities when photos are being taken will be shared
- Examples of great work will be shared to help children at home see what is expected
- Reminders about things coming up will be posted

All remote learning will be accessed using the children's google account on google classrooms except in reception where activities will be posted on Tapestry. All children have been added to their google classroom and teachers have demonstrated how to access the work at school.

Children will be able to submit their work through the google classroom for the teacher to see what they have completed. Teachers will provide a comment back to children but they will not be able to mark work in depth whilst still teaching a class in school.

In the event that a class is forced to self isolate then full remote learning will be reverted to as it was during the period of school closure.
